

Why Attend MAPS PSO Safe Tables?

Ask our Members!

“We loved the tools and facilitated discussion. Our team left the event feeling energized!”

“It is always great to here from fellow MAPS members about their program. I always take away good ideas.”

“Fabulous discussions and shared learnings. This was a great format. “

To learn more, please contact: **Carrie Pinasco**, Senior Director, Quality, Safety and Health Policy

This meeting is complimentary and only open to MAPS PSO members.

Improving Patient Bedside Handoff Safe Table

REGISTER NOW!

Safe Tables are Midwest Alliance for Patient Safety (MAPS) **Patient Safety Organization (PSO) members-only meetings for healthcare providers to share and collaborate.**

Participants discuss patient safety experiences, best practices, **and learn** from experts and each other **in a safe environment**. The education delivers key take-aways that correspond back to submitted PSO adverse events. MAPS PSO Safe Tables feature valuable presentations and facilitated group discussions that lead to new strategies. Attendees are asked to share adverse event challenges and lessons learned. All information is de-identified to ensure an optimal learning environment.

Take this **opportunity** to maximize your program membership by attending our MAPS PSO Virtual Safe Table.

WHO SHOULD ATTEND

- Nurses, Advanced Practice Nurses and Certified Nursing Assistants
- Clinical Educators
- Patient Safety Officers
- Quality and Patient Safety Leaders
- Risk Managers
- Physicians, Physician Assistants and Pharmacists

Administrators and Supervisors involved with patient care are also encouraged to attend.

For questions about the event, contact MAPSHelp@team-iha.org.

This program is sponsored by the Illinois Health and Hospital Association and presented by the Midwest Alliance for Patient Safety PSO

Improving Patient Bedside Handoff Virtual Safe Table

April 22, 2025 - 1:00 - 3:00 pm

Join MAPS members for a hands-on discussion of an important patient safety concern. Experts in patient bedside handoff emphasize its importance in improving patient safety, communication, and overall care quality by ensuring a smooth transition of care between healthcare providers. The Joint Commission, for example, advocates for including patients and families in handoffs whenever appropriate, as it fosters greater understanding and can lead to better outcomes.

Key Aspects and Considerations:

Patient-Centered Approach: Bedside handoffs, when done effectively, can empower patients by involving them in the process, allowing them to clarify information, ask questions, and feel more in control of their care.

Improved Communication and Safety: Bedside handoffs can reduce errors and miscommunication by providing a direct and immediate opportunity for information transfer, clarification, and confirmation, particularly during shift changes.

Meeting Objectives:

At the conclusion of this program, participants will be able to:

- 1) Discuss a Patient-Centered Approach to Bedside handoffs and methods to empower patients by involving them in the process, allowing them to clarify information, ask questions, and feel more in control of their care.
- 2) Examine Standardization and Tools like the I-Pass, SHARQ and others that can help streamline processes, ensure consistency, and promote effective communication across shifts and units.
- 3) Focus on critical Information to prioritize the accurate transfer of essential information, including patient history, current condition, treatment plan, medications, and any relevant precautions.

AGENDA

Check in to join.

- 1:00 PM Welcome and Setting the Stage**
Carrie Pinasco, BS, CDM, BCQS, Senior Director, Quality, Safety and Health Policy, Midwest Alliance for Patient Safety PSO
- 1:15 PM Scaling and Sustaining Safety: Implementing Highly Reliable, System-Wide Communication with I-PASS**
Christopher P. Landrigan, MD, MPH, Co-founder and Executive Council Member, I-Pass Institute
Theresa Murray, MSN, RN, CPPS, LSSBB, Vice President, Clinical Strategy and Transformation, I-Pass Institute
- 2:30 PM MAPS Town Hall-style Discussion on Patient Bedside Handoff Challenges**
Carrie Pinasco, BS, CDM, BCQS, Senior Director, Quality, Safety and Health Policy, Midwest Alliance for Patient Safety PSO
- 2:50 PM Share-out and Wrap up!**
Crystal Lathen, BS, Consultant, Quality, Safety, & Health Policy, Midwest Alliance for Patient Safety PSO

CE Statement: The Illinois Health and Hospital Association (IHA) is authorized by the State of Illinois Department of Financial and Professional Regulation (license number 236.000109) to award up to 2.0 hours of nurse continuing education credit for this program.

Please note that the sponsor of the program is the Illinois Health and Hospital Association.
